FreeU

- FreeU: Free Lunch in Diffusion U-Net
- <https://arxiv.org/abs/2309.11497>
- CVPR 2024

FreeU is a method that improves the quality of the generated images by applying the FreeU operations during the concatenation of skip features and backbone features in the U-Net architecture. The factor b aims to amplify the backbone feature map x , while factor s is designed to attenuate the skip feature map h .
